

*Bryston adapts the patented Cubed Series technology to a
brand new preamplifier*

BP-17³ Is Coming Soon!

Bryston is excited to announce our first new component since the release of the Cubed Series amplifiers to feature our patented Salomie circuit which dramatically reduces noise and distortion at the input stage. We have updated our BP-17 preamplifier to include this new circuit, but have also improved the feature set of this already outstanding preamplifier.

- Expanded Input / Output. Two pairs of XLR outputs and two pairs of RCA outputs make it possible to connect a wide variety of equipment such as amplifiers and powered subwoofers. An RCA tape loop lets you use a line-level equalizer or tape recorder, but best of all, one of the XLR output pairs can be internally selected to have variable (default) or fixed output meaning you can easily connect a BHA-1 or other balanced-input headphone amplifier.
- The original BP-17 only had single ended inputs. The new Cubed Series model includes two pairs of balanced inputs as well.
- Options! Order the BP-17³ with a high quality MM Phono stage, high resolution DAC, both, or neither.
- Full control! Select sources, adjust volume, and more all from the optional BR-2 remote control or via RS232.

Bryston is proud to offer our new high performance, one-box preamp.

How much and when can you get it?

We currently estimate that we will begin shipping the BP-17³ in September. The new model will retail for \$3995 - only a \$200 increase over the previous edition.

Pre-order specials!

As an incentive to queue up for the first units, we're offering a special to dealers and customers that place a pre-order by August 31. Any preorder received between now and August 31 qualifies for a free option. Pick one of the following: an internal phono stage, internal DAC, or BR-2 remote control.

Speaking of DAC options...

Effective immediately, Bryston has reduced the price of our optional internal DACs on all of our preamps and integrated amps from \$1595 to \$750. Great deal!

What about the original BP-17?

We will begin retiring the original BP-17 right away. We have parts to make a few more, so if you have an ongoing sales effort for the original BP-17, please let us know as soon as possible. Special pricing may be available on the remaining units. Contact Gary or James for info.
