

C1100 stereo preamplifier

- The C1100 preamplifier brings a new level of performance and luxury to McIntosh's heralded preamplifier offerings with its high level inputs boasting the lowest noise of any McIntosh preamplifier ever produced.
- Its two-chassis design results in absolute isolation of a preamplifier's two main functions – control and sound – providing you with the purest sound reproduction possible for generations of listening enjoyment.
- A full suite of analog inputs lets you connect all your current and legacy music devices.
- For personal listening pleasure, the headphone jack features a higher output than any of our other preamplifiers, while Headphone Crossfeed Director (HXD®) brings a new depth and spatiality to your music.
- The Home Theater Pass Through feature allows for seamless integration into your existing multi-channel home theater system.
- Both chassis are comprised of polished stainless steel and hairline brushed black Titanium stainless steel, offering a new degree of richness and refinement.

Performance and Luxury for Generations to Come
